INTRODUCTION

The monthly report of the PDA is the report presenting a comprehensive analysis of the status, structure and dynamics of the public debt of the Republic of Serbia, as well as the risk analysis related to the process of public debt management, aimed at raising the level of transparency and accurate and timely awareness of investors, state institutions and other entities interested in the public debt of the Republic of Serbia.

The PDA Monthly Report is published aiming at the improvement of the activities of the Republic of Serbia in the field of public debt through its informative contents, in accordance with internationally acknowledged standards and good business practice, as well as enabling stakeholders to grasp public debt, being the field of the public finance, in an easy and accurate manner, i.e. the activities and goals of the PDA.

INTRODUCTORY WORD OF DIRECTOR

Issuance program throughout domestic and international capital market represents the main funding source in 2013. During this year PDA achieved historically the highest level of domestic market operations with total value of RSD 401.8bn which represents above 64.0% of all receivings. Besides domestic market, there were activities on international securities market with issuance of Serbia 2020 in February, with coupon rate 4.875% and Serbia 2018 in November with coupon rate 5.875%. One-third of all obligations PDA covered through Eurobonds issuances (RSD 208.0bn), while total withdraws from Russian Federation Loan amounted to USD 300.0mln. As 97% of total liabilities were covered with marketable funding instruments, we can confidently conclude that the last year has been very successful.

It's important to emphasize that during the first five months and the last three months in 2013, borrowing costs on domestic Government Securities Market significantly decreased. In many tenors Government Securities primary market accepted rates reached the historical lowest level. In November 2013, Government adopted Fiscal Strategy with aim to decrease budget deficit till 2016, which is a basic requirement for stabilization of Public Debt to GDP ratio. According to Financial Plan for 2014, it is foreseen that the most of liabilities will be paid from Government securities. Due to Budge Law for 2014, total receivings from Government securities issued on domestic market will amount to RSD 330.0bn, Eurobonds will amount to USD 750.0mln, while the rest of funding needs will be provided through bilateral and multilateral credit loans (RSD 264.0bn). Development of domestic market through development of instruments and yield curve, made Serbia's market attractive for foreign investors. That market condition results with very high price volatility in case of any global or domestic economic or political shocks. The last FED announcement about QE III will impact on our future borrowing capacity. PDA will continue to monitor global trends with aim to keep on with our Public Debt and borrowing Strategy implementation.

*Direktor
Branko Drčelić*

ORGANIZATION AND COMPETENCES

Owing to the increased indebtedness of the most of the European countries, public debt policy, presenting a branch of economic policy, is becoming increasingly important. In accordance with the international practise and proposals of the World Bank, Public Debt Administration was founded on 1 October 2009 presenting an administrative authority within the Ministry of Finance of the Republic of Serbia. The primary objective of the Public Debt Administration is the minimizing of borrowing costs having the acceptable level of risk, i.e. the establishment of their optimal relations. According to the regulations defining the system of public finance, public debt servicing presents an absolute and unconditional obligation having the priority over all the remaining budgetary obligations. It is especially important to emphasize that the obligation referring to the repayment of due public debt does not cease even during the temporary suspension of the budget execution.

All of the above-mentioned data indicate the importance of the existence and efficient functioning of the Public Debt Administration, being the holder of public debt policy. The legal basis for the establishment and functioning of the Public Debt Administration is provided under the Public Debt Law, the Law on Budget of the Republic of Serbia, the Budget System Law and other regulations. In accordance with the Public Debt Law, the Public Debt Administration on behalf of the Republic of Serbia may borrow in country or abroad, i.e. on domestic or foreign market, in domestic and foreign currency, to finance budget deficit, to refinance the outstanding debt, to finance projects having general importance, as well as to perform other obligations defined by the Law. On the other hand, the Budget System Law defines general and specific fiscal rules regulating fiscal discipline.

STRATEGIC GUIDELINES

The current medium term strategy has been developed in cooperation with the World Bank experts, using the MTDS model (Medium Term Debt Strategy), which was implemented in practice in numerous countries all round the world. The document defines the following guidelines:

- I Ensuring the financing of fiscal deficit of the Republic of Serbia, within the meaning of short-term deficit (liquidity) and long-term deficit, being an integral part of the policy aimed at maintaining stability of the public finance system;
- II Defining an acceptable level of risk, in accordance with the targeted structure of public debt implying the structure of debt in terms of currency, structure of interest rates, structure of maturity and structure of debt with regard to the instruments;
- III Support to the development of the market of government securities issued on domestic and international market, with the aim of reducing medium-term and long-term borrowing expenses;
- IV Raising the level of transparency and predictability of the process of borrowing;
- V The Public Debt Management Strategy ought to be supported and consistent with the general medium term framework of the Government;

On 30 June 2014, the share of debt denominated in dinars amounted to 22.3%. The share of the debt denominated in dinars is rather low, however it has been increasing in the last four years. Through the introduction of securities denominated in dinars having longer maturity (five-year and seven-year maturity), the risk of refinancing, which is typical for securities denominated in dinars, is decreasing creating an adequate yield curve relating to domestic currency. The objective of the Public Debt Management Strategy is to execute the most of the needs for the financing of the Republic of Serbia on domestic market, through the issuance in dinars, which is in accordance with the dinarization strategy.

LAW ON BUDGET, EXECUTION OF THE BUDGET OF THE REPUBLIC OF SERBIA FOR THE YEAR 2014

In accordance with the Public Debt Law ("Official Gazette of RS, No. 61/05 and 107/09), presenting the legal basis for borrowing of the Republic of Serbia, the Republic of Serbia may borrow in country or abroad, i.e. on domestic or foreign market, in domestic and foreign currency. The Republic of Serbia may borrow to finance current account deficit, to service the outstanding debt (refinancing), and to finance investment projects. Based on the above-mentioned, in addition to maintaining liquidity, borrowing, i.e. public debt has a developing role as well. Apart from direct borrowing, the Republic of Serbia may issue guarantees in favour of public enterprises and local self-government units.

In accordance with the above-stated Law, the public debt of the Republic of Serbia is as follows:

- I Debt of the Republic, based on agreements concluded by the Republic,
- II Debt of the Republic based on issuing securities,
- III Debt of the Republic based on contracts/agreements according to which obligations of the Republic, pursuant to previously concluded agreements, have been rescheduled,
- IV Debt of the Republic, based on the guaranty issued by the Republic, and/or based on counter-guaranty issued by the Republic,
- V Debt of local government and legal entities founded by the state for which the Republic has issued guarantees.

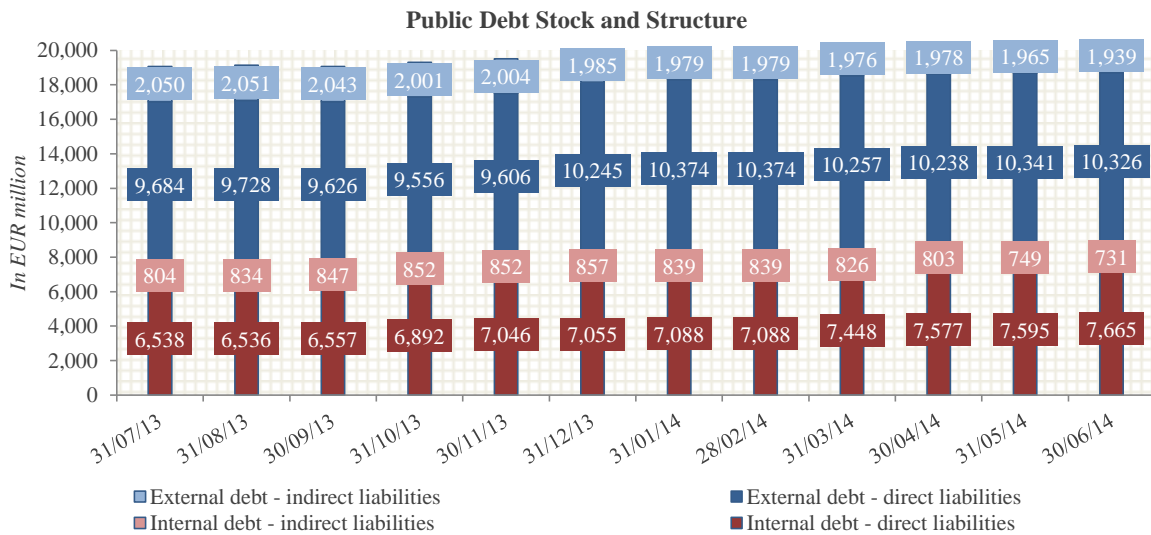

PUBLIC DEBT ANALYSIS

General Government Debt and Public Debt Stock and Structure as of May 31, 2014

	EUR	USD	RSD	GDP%
