INTRODUCTION

The monthly report of the PDA is the report presenting a comprehensive analysis of the status, structure and dynamics of the public debt of the Republic of Serbia, as well as the risk analysis related to the process of public debt management, aimed at raising the level of transparency and accurate and timely awareness of investors, state institutions and other entities interested in the public debt of the Republic of Serbia.

The PDA Monthly Report is published aiming at the improvement of the activities of the Republic of Serbia in the field of public debt through its informative contents, in accordance with internationally acknowledged standards and good business practice, as well as enabling stakeholders to grasp public debt, being the field of the public finance, in an easy and accurate manner, i.e. the activities and goals of the PDA.

INTRODUCTORY WORD OF DIRECTOR

Issuance program on domestic capital market represented the main funding source in past period. Fiscal consolidation measures implemented by the Government provided a significant contribution to the stabilization of the public finance of the Republic of Serbia. We continued to reduce the borrowing costs on the domestic financial market, regarding the issued dinar and euro-denominated Government Securities, while the volume of the secondary market trading became considerably increased. In 2017 the Republic of Serbia achieved volume of operations in terms of Government Securities on the domestic financial market amounting to 347.5 bn dinars with a permanent decrease in the borrowing costs. Last year we continued with the successful cooperation with international financial institutions in order to secure favorable long-term sources for financing investment projects, budget expenditures and managed to reduce the interest rates on guaranteed loans.

Due to successful implementation of Fiscal Strategy, the 2017 budget surplus amounted to 33 billion dinars at the Central Government level. The realization of the budget surplus enabled a lower volume of Government borrowing than that initially estimated. As the majority of funds collected in 2017 was provided via market-based instruments, i.e. Government Securities on the domestic financial market, we can conclude that the continuation of successful strategy of the domestic financial market development was achieved. After many years of developing the maturity yield curve, the conditions for the benchmark bond issuance have been created. It is one of the main conditions for accelerating the secondary market trading and including dinar securities into the global index.

During 2017, the seven year benchmark RSD bond was sold out. The amount offered was 110 billions dinars. By issuing this one, as well as previous benchmark bonds, the key part for further development of domestic financial market has been made, with the focus on the increase of the secondary trading. We would like to emphasize that the Ministry of Finance - Public Debt Administration, in cooperation with the Belgrade Stock Exchange, allowed trading with the Government Securities on the domestic SE market since November 2015. Having in mind the position of the Republic of Serbia on the international capital market, which has improved over the years, the local market of Government Securities has become a recognizable part of global financial market. With a commitment to maintain stability and further development of domestic market, the Ministry of Finance - Public Debt Administration carefully monitors events on the world financial markets adjusting its public debt management policy in order to achieve strategic objectives defined by the Public Debt Management Strategy.

The plan for 2018 is to continue the development of the domestic financial market, introducing new benchmark government bonds in local currency with the maturity of five and ten years. The planned volume of operations in accordance with the Law on Budget of the Republic of Serbia for 2018 on the domestic financial market is 365 billion dinars, out of which 244 billion dinars would be provided from the issue of local currency government bonds, and 121 billion dinars from the issue of euro denominated government securities.

In 2018, it has been planned to execute liability management operations in the amount of 180 billion dinars. Also, in the same year, a legal framework for issuance of so called retail bonds was defined and first issuance was executed.

*Acting Director of the Public Debt Administration in the Ministry of Finance
Branko Drčelić*

ORGANIZATION AND COMPETENCES

Owing to the increased indebtedness of the most of the European countries, public debt policy, presenting a branch of economic policy, is becoming increasingly important. In accordance with the international practise and proposals of the World Bank, Public Debt Administration was founded on 1 October 2009 presenting an administrative authority within the Ministry of Finance of the Republic of Serbia. The primary objective of the Public Debt Administration is the minimizing of borrowing costs having the acceptable level of risk, i.e. the establishment of their optimal relations. According to the regulations defining the system of public finance, public debt servicing presents an absolute and unconditional obligation having the priority over all the remaining budgetary obligations. It is especially important to emphasize that the obligation referring to the repayment of due public debt does not cease even during the temporary suspension of the budget execution.

All of the above-mentioned data indicate the importance of the existence and efficient functioning of the Public Debt Administration, being the holder of public debt policy. The legal basis for the establishment and functioning of the Public Debt Administration is provided under the Public Debt Law, the Law on Budget of the Republic of Serbia, the Budget System Law and other regulations. In accordance with the Public Debt Law, the Public Debt Administration on behalf of the Republic of Serbia may borrow in country or abroad, i.e. on domestic or foreign market, in domestic and foreign currency, to finance budget deficit, to refinance the outstanding debt, to finance projects having general importance, as well as to perform other obligations defined by the Law. On the other hand, the Budget System Law defines general and specific fiscal rules regulating fiscal discipline.

STRATEGIC GUIDELINES

The current medium term strategy has been developed in cooperation with the World Bank experts, using the MTDS model (Medium Term Debt Strategy), which was implemented in practice in numerous countries all round the world. The document defines the following guidelines:

- I Ensuring the financing of fiscal deficit of the Republic of Serbia, within the meaning of short-term deficit (liquidity) and long-term deficit, being an integral part of the policy aimed at maintaining stability of the public finance system;
- II Defining an acceptable level of risk, in accordance with the targeted structure of public debt implying the structure of debt in terms of currency, structure of interest rates, structure of maturity and structure of debt with regard to the instruments;
- III Support to the development of the market of government securities issued on domestic and international market, with the aim of reducing medium-term and long-term borrowing expenses;
- IV Raising the level of transparency and predictability of the process of borrowing;
- V The Public Debt Management Strategy ought to be supported and consistent with the general medium term framework of the Government.

On 31 December 2017, the share of debt denominated in dinars amounted to 23%. The share of the debt denominated in dinars is rather low, however it has been increasing in the last four years. Through the introduction of securities denominated in dinars having longer maturity (five-year and seven-year maturity), the risk of refinancing, which is typical for securities denominated in dinars, is decreasing creating an adequate yield curve relating to domestic currency. The objective of the Public Debt Management Strategy is to execute the most of the needs for the financing of the Republic of Serbia on domestic market, through the issuance in dinars, which is in accordance with the dinarization strategy.

PUBLIC DEBT LAW

In accordance with the Public Debt Law ("Official Gazette of RS, No. 61/05, 107/09, 78/2011 and 68/2015), presenting the legal basis for borrowing of the Republic of Serbia, the Republic of Serbia may borrow in country or abroad, i.e. on domestic or foreign market, in domestic and foreign currency. The Republic of Serbia may borrow to finance current account deficit, to service the outstanding debt (refinancing), and to finance investment projects. Based on the above-mentioned, in addition to maintaining liquidity, borrowing, i.e. public debt has a developing role as well. Apart from direct borrowing, the Republic of Serbia may issue guarantees in favour of public enterprises and local self-government units.

In accordance with the above-stated Law, the public debt of the Republic of Serbia is as follows:

- I Debt of the Republic, based on agreements concluded by the Republic,
- II Debt of the Republic based on issuing securities,
- III Debt of the Republic based on contracts/agreements according to which obligations of the Republic, pursuant to previously concluded agreements, have been rescheduled,
- IV Debt of the Republic, based on the guaranty issued by the Republic, and/or based on counter-guaranty issued by the Republic,
- V Debt of local government and legal entities founded by the state for which the Republic has issued guarantees.
