INTRODUCTION

The monthly report of the Public Debt Administration is the report presenting a comprehensive analysis of the status, structure and dynamics of the public debt of the Republic of Serbia, as well as the risk analysis related to the process of public debt management, aimed at raising the level of transparency and accurate and timely awareness of investors, state institutions and other entities interested in the public debt of the Republic of Serbia.

The Public Debt Administration Monthly Report is published aiming at the improvement of the activities of the Republic of Serbia in the field of public debt through its informative contents, in accordance with internationally acknowledged standards and good business practice, as well as enabling stakeholders to grasp public debt, being the field of the public finance, in an easy and accurate manner, i.e. the activities and goals of the Public Debt Administration.

INTRODUCTORY WORD OF THE DIRECTOR

The last quarter of the year 2012 was marked by the commencement of the implementation of fiscal consolidation measures. One of the basic goals in the following mid-term period is to influence the level of borrowing through the decrease in the budget deficit. Until fiscal consolidation measures have produced full results, the Public Debt Administration will assume the burden of providing the funds for regular execution of budget expenditures. The plan of borrowing, defined by the annual

budget in the scope of the mid-term strategic plan, should contribute to sustainability of public finance of the Republic of Serbia. As it was the case in the year 2012, the borrowing on domestic and international financial markets will be the main source for the financing of budgetary needs of the Republic of Serbia in the coming year. Prudent fiscal policy and borrowing operations in accordance with the fundamental strategic goal of the public debt management policy should present the backbone and the main factor of stability of the public finance system as well as the guarantee for macroeconomic stability. Ministry of Finance and Economy- Public Debt Administration continued introducing new debt instruments in the year 2012, which led to the extension of average maturity of dinar-denominated public debt and to the improvement of risk indicators. The Public Debt Administration has prepared the Public Debt Management Strategy 2013-2015, presenting an integral part of the Fiscal Strategy for the year 2013, with the projections for the years 2014 and 2015. The

Government adopted the said Strategy in November 2012. It defines an absolute decrease in the budget deficit and a relative decrease in public debt relative to GDP as two main fiscal objectives. According to the main document of the Government of the Republic of Serbia in the field of fiscal policy, it is expected that the budget deficit, presenting the main factor for defining the level of borrowing, will be reduced by half in the year 2013, *i.e.* it will reach the level of 3.6% of GDP. The budget deficit is expected to amount to 1% of GDP in the year 2015 owing to the positive effects of the implementation of fiscal measures, primarily through expenditure limits, considerable growth of real GDP based on the increase in net exports and the investments in fixed capital. A mid-term scenario defined in this manner should decrease the needs for borrowing and thus contribute to the drop in the relative indebtedness of the Republic of Serbia. At the end of 2015, the indebtedness ought to reach up to 58% of GDP.

Republic of Serbia successfully returned on international market on 14th of February by issuing a new \$1.5 billion benchmark bond due 2020 with a coupon of 4.875%. High quality institutional investors from the US anchored the book, which closed with orders from close to 150 accounts globally. Majority of investors came from US, UK, and UAE. Accepted yield was 5.15% whereas initial yield was 5.20%. The issuance of \$1.5 billion due 2020 is done in accordance with the Government Financing Plan for 2013. The part of the issued amount will be used for buyback of previous loans with higher expenses. Comparing to Serbia 2021, issued in September 2011 with the yield of 7.5%, Republic of Serbia achieved better results in

borrowing expenses for 2.35%. The latest results are confirming foreign investor higher confidence in Serbian economy and public finances than in previous period.

The Public Debt Administration is doing its best to make its capacities capable of public debt management and performing other activities as defined by the Public Debt Law, being the legal framework. Technical cooperation with the World Bank and IMF as well as with other international partners is rather significant in this respect. Nevertheless, understanding and support of relevant domestic institutions is necessary on that path.

New measures aimed at fiscal stabilization and relative decrease in public debt, as well as the latest issuance of Eurobonds prove that the liquidity of the state has been ensured and that there is trust relating to the sustainability of public finance in the medium and the long run.

Director

Branko Drcelic

ORGANIZATION AND COMPETENCES

Owing to the increased indebtedness of the most of the European countries, public debt policy, presenting a branch of economic policy, is becoming increasingly important. In accordance with the international practise and proposals of the World Bank, Public Debt Administration was founded on 1 October 2009 presenting an administrative authority within the Ministry of Finance and Economy of the Republic of Serbia. The primary objective of the Public Debt Administration is the minimizing of borrowing costs having the acceptable level of risk, *i.e.* the establishment of their optimal relations.

According to the regulations defining the system of public finance, public debt servicing presents an absolute and unconditional obligation having the priority over all the remaining budgetary obligations. It is especially important to emphasize that the obligation referring to the repayment of due public debt does not cease even during the temporary suspension of the budget

execution. All of the above-mentioned data indicate the importance of the existence and efficient functioning of the Public Debt Administration, being the holder of public debt policy.

The legal basis for the establishment and functioning of the Public Debt Administration is provided under the Public Debt Law, the Law on Budget of the Republic of Serbia, the Budget System Law and other regulations.

In accordance with the Public Debt Law, the Public Debt Administration on behalf of the Republic of Serbia may borrow in country or abroad, *i.e.* on domestic or foreign market, in domestic and foreign currency, to finance budget deficit, to refinance the outstanding debt, to finance projects having general importance, as well as to perform other obligations defined by the Law.

On the other hand, the Budget System Law defines general and specific fiscal rules regulating fiscal discipline.

STRATEGIC GUIDELINES

The current medium term strategy has been developed in cooperation with the World Bank experts, using the MTDS model (Medium Term Debt Strategy), which was implemented in practice in numerous countries all round the world. The document defines the following guidelines:

- 1) Ensuring the financing of fiscal deficit of the Republic of Serbia, within the meaning of short-term deficit (liquidity) and long-term deficit, being an integral part of the policy aimed at maintaining stability of the public finance system.
- 2) Defining an acceptable level of risk, in accordance with the targeted structure of public debt implying the structure of debt in terms of currency, structure of interest rates, structure of maturity and structure of debt with regard to the instruments.
- 3) Support to the development of the market of government securities issued on domestic and international market, with the aim of reducing medium-term and long-term borrowing expenses.
- 4) Raising the level of transparency and predictability of the process of borrowing.
- 5) The Public Debt Management Strategy ought to be supported and consistent with the general medium term framework of the Government.

On 30 June 2013, the share of debt denominated in dinars amounted to 18.8%. The share of the debt denominated in dinars is rather low, however it has been increasing in the last four years. Through the introduction of securities denominated in dinars having longer maturity (three-year and five-year maturity), the risk of refinancing, which is typical for securities denominated in dinars, is decreasing creating an adequate yield curve relating to domestic currency.

The objective of the Public Debt Management Strategy is to execute the most of the needs for the financing of the Republic of Serbia on domestic market, through the issuance in dinars, which is in accordance with the dinarization strategy.

*LAW ON BUDGET, EXECUTION OF THE BUDGET
OF THE REPUBLIC OF SERBIA FOR THE YEAR 2012*

In accordance with the Public Debt Law (“Official Gazette of RS, No. 61/05 and 107/09), presenting the legal basis for borrowing of the Republic of Serbia, the Republic of Serbia may borrow in country or abroad, i.e. on domestic or foreign market, in domestic and foreign currency. The Republic of Serbia may borrow to finance current account deficit, to service the outstanding

debt (refinancing), and to finance investment projects.

Based on the above-mentioned, in addition to maintaining liquidity, borrowing, *i.e.* public debt has a developing role as well. Apart from direct borrowing, the Republic of Serbia may issue guarantees in favour of public enterprises and local self-government units.

In accordance with the above-stated Law, the public debt of the Republic of Serbia is as follows:

- 1) Debt of the Republic, based on agreements concluded by the Republic,
- 2) Debt of the Republic based on issuing securities,
- 3) Debt of the Republic based on contracts/agreements according to which obligations of the Republic, pursuant to previously concluded agreements, have been rescheduled,
- 4) Debt of the Republic, based on the guaranty issued by the Republic, and/or based on counter-guaranty issued by the Republic,
- 5) Debt of local government and legal entities founded by the state for which the Republic has issued guarantees.
