## INTRODUCTION

The monthly report of the Public Debt Administration is the report presenting a comprehensive analysis of the status, structure and dynamics of the public debt of the Republic of Serbia, as well as the risk analysis related to the process of public debt management, aimed at raising the level of transparency and accurate and timely awareness of investors, state institutions and other entities interested in the public debt of the Republic of Serbia.

The Public Debt Administration Monthly Report is published aiming at the improvement of the activities of the Republic of Serbia in the field of public debt through its informative contents, in accordance with internationally acknowledged standards and good business practice, as well as enabling stakeholders to grasp public debt, being the field of the public finance, in an easy and accurate manner, i.e. the activities and goals of the Public Debt Administration.

### INTRODUCTORY WORD OF THE DIRECTOR

Issuance program throughout domestic and international capital market represents the main funding source in 2013. Structural reforms of public finance as well as export oriented economy cannot provide budget stability on short-term run, which create high level of gross funding needs mainly for financing of budget deficit.

During the first five months PDA manage to reduce borrowing costs on domestic capital market for both RSD as well as EUR denominated Government Securities. In the last week of February 2013, PDA realized the most successful Eurobond issuance, Serbia 2020, with issuance size of USD 1.5bn and coupon rate of 4,875%. Investor base significantly increased since the first Eurobond issuance in September 2011, which results with double size of orderbook as well as the lowest re-offer yield 5.15% during the issuance of Serbia 2020.

In accordance with Fiscal Consolidation Program, the Parliament of the Republic of Serbia, adopted the Supplementary Budget Law for 2013, with higher level of gross funding needs mainly due to an increase of expected level of budget deficit from 4.7% to 5.2%. Despite to higher level of gross funding needs, PDA manages to create appropriate issuance program in order to provide required liquidity. As of 30 September, PDA realized 80% of financing plan on domestic securities market. Despite

pressure on primary market during Q3, PDA maintained primary market accepted rates on appropriate-low level. In accordance with the Supplementary Budget for 2013, Republic of Serbia will have to issue around USD 1.0bn on international market till the end of year.

Although domestic securities market is not developed enough, especially secondary market, in the last few years mainly due to dedicated cooperation with global investors, we created sustainable investor base. Therefor issuance policy relies on global trends, especially FED policy.

The PDA will try to keep up with global market trends with aim to fulfil main strategic principles and reduce borrowing costs with acceptable level of risk.

Director

Branko Drcelic

### ORGANIZATION AND COMPETENCES

Owing to the increased indebtedness of the most of the European countries, public debt policy, presenting a branch of economic policy, is becoming increasingly important. In accordance with the international practise and proposals of the World Bank, Public Debt Administration was founded on 1 October 2009 presenting an administrative authority within the Ministry of Finance of the Republic of Serbia. The primary objective of the Public Debt Administration is the minimizing of borrowing costs having the acceptable level of risk, *i.e.* the establishment of their optimal relations.

According to the regulations defining the system of public finance, public debt servicing presents an absolute and unconditional obligation having the priority over all the remaining budgetary obligations. It is especially important to emphasize that the obligation referring to the repayment of due public debt does not cease even during the temporary suspension of the budget

execution. All of the above-mentioned data indicate the importance of the existence and efficient functioning of the Public Debt Administration, being the holder of public debt policy.

The legal basis for the establishment and functioning of the Public Debt Administration is provided under the Public Debt Law, the Law on Budget of the Republic of Serbia, the Budget System Law and other regulations.

In accordance with the Public Debt Law, the Public Debt Administration on behalf of the Republic of Serbia may borrow in country or abroad, *i.e.* on domestic or foreign market, in domestic and foreign currency, to finance budget deficit, to refinance the outstanding debt, to finance projects having general importance, as well as to perform other obligations defined by the Law.

On the other hand, the Budget System Law defines general and specific fiscal rules regulating fiscal discipline.

### *STRATEGIC GUIDELINES*

The current medium term strategy has been developed in cooperation with the World Bank experts, using the MTDS model (Medium Term Debt Strategy), which was implemented in practice in numerous countries all round the world. The document defines the following guidelines:

- 1) Ensuring the financing of fiscal deficit of the Republic of Serbia, within the meaning of short-term deficit (liquidity) and long-term deficit, being an integral part of the policy aimed at maintaining stability of the public finance system.
- 2) Defining an acceptable level of risk, in accordance with the targeted structure of public debt implying the structure of debt in terms of currency, structure of interest rates, structure of maturity and structure of debt with regard to the instruments.
- 3) Support to the development of the market of government securities issued on domestic and international market, with the aim of reducing medium-term and long-term borrowing expenses.
- 4) Raising the level of transparency and predictability of the process of borrowing.
- 5) The Public Debt Management Strategy ought to be supported and consistent with the general medium term framework of the Government.

On 30 November 2013, the share of debt denominated in dinars amounted to 20.9%. The share of the debt denominated in dinars is rather low, however it has been increasing in the last four years. Through the introduction of securities denominated in dinars having longer maturity (five-year and seven-year maturity), the risk of refinancing, which is typical for securities denominated in dinars, is decreasing creating an adequate yield curve relating to domestic currency.

The objective of the Public Debt Management Strategy is to execute the most of the needs for the financing of the Republic of Serbia on domestic market, through the issuance in dinars, which is in accordance with the dinarization strategy.

*LAW ON BUDGET, EXECUTION OF THE BUDGET  
OF THE REPUBLIC OF SERBIA FOR THE YEAR 2013*

In accordance with the Public Debt Law (“Official Gazette of RS, No. 61/05 and 107/09), presenting the legal basis for borrowing of the Republic of Serbia, the Republic of Serbia may borrow in country or abroad, i.e. on domestic or foreign market, in domestic and foreign currency. The Republic of Serbia may borrow to finance current account deficit, to service the outstanding

debt (refinancing), and to finance investment projects.

Based on the above-mentioned, in addition to maintaining liquidity, borrowing, *i.e.* public debt has a developing role as well. Apart from direct borrowing, the Republic of Serbia may issue guarantees in favour of public enterprises and local self-government units.

In accordance with the above-stated Law, the public debt of the Republic of Serbia is as follows:

- 1) Debt of the Republic, based on agreements concluded by the Republic,
- 2) Debt of the Republic based on issuing securities,
- 3) Debt of the Republic based on contracts/agreements according to which obligations of the Republic, pursuant to previously concluded agreements, have been rescheduled,
- 4) Debt of the Republic, based on the guaranty issued by the Republic, and/or based on counter-guaranty issued by the Republic,
- 5) Debt of local government and legal entities founded by the state for which the Republic has issued guarantees.
